

Lulu Kopp's High Energy Paintings

Exposé for Exhibitions

I am submitting a proposal for an Associate Art Exhibit) oil and watercolor paintings.
A selection of 10 paintings with Titles and Images, you find below.

Motivation

The pure joy of life motivates me and directly influences my work. We live amongst a rich palette of colors and contrasts in which I am directly inspired. The fascination of color; yellow + dark violet, orange + blue, and red + turquoise unite in my work through a powerful symbiosis, creating a positive energy that must be shared.

The medium acts as the vehicle for this series of works. Oil paint mixing with watercolors work together and against each other on the thick paper. They each have a will of their own but in tandem floating waves and rays of light burst into life.

HIGH ENERGY emerges through my continued interest of the 'dark matter' confronting pure rays of light. Analogous to astrophysics, in which through the search for the basic we find answers to the fundamental questions about the nature of the universe. Materializing through my HIGH ENERGY paintings is a natural vibrancy that we are all drawn to, leading us to the ultimate power of life or 'Urkraft.'

The Three Dimensional Series of Nefertari : 3D

The rounded trapezoid of the 'Nefertari' series has been inspired by the ancient story of the treasure chamber of Nefertari, the wife of the Egyptian pharaoh Ramses II, at her temple in Abu Simbel.
